

## National Network of Libraries of Medicine Greater Midwest Region

The National Network of Libraries of Medicine (NNLM) office for the Greater Midwest Region is located at Hardin Library for the Health Sciences at the University of Iowa. By collaborating, training, and funding over 1,100 health centers, health departments, community organizations, as well as medical, public, and school libraries in a 10 state region, the office supports the mission of the NNLM to advance the progress of medicine and improve public health through access to health information.

### Join the Network

Any library, health-related information center, health department, or other organization who provides access to health information may join the Network. For more information:

## Realizing Medicine: How Virtual Reality and Augmented Reality are Impacting Medical Practice and Education

### NNLM GMR TECH TOPIC

Sunday, 15 October 2017

1:00 pm – 2:00 pm

Midwest/MLA & MHSLA 2017  
Joint Annual Conference

## Jennifer Herron

Jennifer Herron is the Emerging Technologies Librarian for the Ruth Lilly Medical Library, Indiana University School of Medicine. Jennifer started out as a Library Assistant in a small health sciences library and came to Indiana University from a hospital library. She is currently working on promoting 3D printing and testing out

Augmented and Virtual Reality applications in medical education. Jennifer has always been interested in technology and enjoys testing it out to see its potential uses in the library, for education, and making everyday life easier. Jennifer is especially interested in watching how mobile technology will impact healthcare.

## Jason Lilly

Jason Lilly is the Library Systems Analyst for the Ruth Lilly Medical Library. He serves as webmaster for the library's website, manages library systems such as ILLiad and Sirsi, and assists with the library's social media presence. He received his MLS in 2008 from Indiana University and has his BA in English Literature. Jason has

worn many different hats throughout his library career starting off as a library aide shelving books in a public library, has worked as a Security Supervisor and Circulation Desk Manager in a large academic library, and was Reference Informationist at RLML prior to his current position. Jason has always had an affinity for technology and enjoys exploring the intricacies of new systems and software. In his spare time, he is an avid PC gamer, fantasy lit aficionado, and a dedicated runner with several top 10 finishes in local races.

# Realizing Medicine: How Virtual Reality and Augmented Reality are Impacting Medical Practice and Education

## PANELISTS

## Kellie Kaneshiro

Kellie Kaneshiro is the Assistant Director for Library Technology for the Ruth Lilly Medical Library. She serves as chief cook and bottle washer for the Library's technology team. She received her BS from Purdue University in Microbiology, and her AMLS from the University of

Michigan. She started her career as an information services librarian at the Houston Academy of Medicine-Texas Medical Center Library before moving to the Ruth Lilly Medical Library at the Indiana University School of Medicine's Indianapolis campus. Kellie has a longstanding interest in how technology impacts society, and is also interested in empowering women in science, technology, engineering, mathematics and medicine. Outside of work, she enjoys drawing and traveling around the Great Lakes.
